TASK – 9

Attribute Routing with constraints:

```
Controllers > C# WeatherForecastController.cs > {} ActionFilter.Controllers > UserController

6
7    [ApiController]
8    [Route("[controller]")]
     0 references
9    public class UserController : ControllerBase
10   {
         0 references
11       public string Get()
12       {
13           return "User Page";
14       }
15       [Route("{id:int}")]
         0 references
16       public string GetById(int id)
17       {
18           return "Hello Int : " + id;
19       }
20
21       [Route("{id}")]
         0 references
22       public string GetByIdString(string id)
23       {
24           return "Hello String : " + id;
25       }
26   }
27
```

localhost:5151/user

User Page

localhost:5151/user/ghk

Hello String : ghk

Hello Int : 1111
